

**Structural Engineer - Junior Facade designer
Stockholm Office**

ACC is Scandinavia's leading glass and facade consultant. We offer independent consultation on all types of glazed constructions. Our expertise includes construction and design, daylight and indoor climate, sustainability, economy and inspections. Together with architects, builders, entrepreneurs and other actors in the Nordic construction market, we are building tomorrow's society.

We are a small company with great opportunities, today we are approximately 30 employees in our offices in Stockholm and Gothenburg, along with a subsidiary in Norway. Since our start in 1988, we have completed approximately 3500 different projects. As an Increasing number of developers and designers discover the benefit of proper glass and façade design, the demand for our services is steadily increasing. Thus, we need to expand our team and we're hoping you will join us!

Our offer to you

- To work with some of the most exciting construction projects in the country, in which glass, environment, design, and function are in focus.
- To join a fast-growing company at the forefront of glass and facade structures.
- A key role within the company in which your skills are requested and highly valued.
- The opportunity to develop your skills to achieve your professional goals.

Description of the role

You will work as a structural engineer with focus on facade design. This includes:

- Development of system solutions suitable for different facades, requirements and solutions.
- 3D-sketching, detailing and static calculation.
- Presenting your work in easily comprehensive reports, presentations, sketchbooks and specifications

You will be working in close cooperation the project manager at ACC and sometimes with architects, building contractors, construction engineers, glass contractors, project managers. Together with your PL, you will discuss different solutions, ranging from complex technical calculations to design and design. You will work in close cooperation with your colleagues, where everyone contributes with their specialist knowledge.

You will have the opportunity to work with and learn a lot of some of the most experienced facade specialists in Scandinavia. You will have the opportunity to participate in and influence interesting projects consisting of technically and economically sustainable facades, with ever-evolving demands and possibilities.

Desired qualifications

- Master of Science in Construction Engineering or Engineering within design.
- Good knowledge of building physics.
- Good computer skills and easy to learn a new computer programmes.
- Comfortable with English, both in speech and in writing.
- Preferred but not required: Experience with AutoCAD, Revit, Sketchup, Wood/Steel course at University (KTH) and Swedish skills.

The job does not require you to have specific knowledge of or experience with glass and facades, but you need a general knowledge and understanding of building technology and engineering design solutions. You will be given the necessary training and induction, and you will work with and learn from some of the best facade designers in Sweden.

Location: Stockholm (Hornstull, Södermalm)

Start: As soon as possible.
