

## ***Construction Engineer - Junior Façade designer*** ***To our office in Gothenburg***

*ACC is Scandinavia's leading glass and facade consultant. We offer independent consultation on all types of glazed constructions. Our collected competence includes construction and design, daylight and indoor climate, sustainability, economy and inspections. We are building tomorrow's society together with architects, builders, entrepreneurs and other actors in the Nordic construction market.*

*We are a small company with great opportunities, today we are approximately 30 employees in our offices in Stockholm and Gothenburg, we also have a subsidiary in Norway. Since our start in 1988, we have completed approximately 4000 different projects. Increasing number of developers and designers discover the benefit of proper glass and façade design and the demand for our services is steadily increasing.*

### Our offer to you

- An employment where you work with some of the most exciting construction projects in which glass, Environment, design, and function are in focus.
- Being a member of a prominent company that is growing and that is at the forefront of glass and façade structures.
- To have a key role in which your skills are requested and highly valued.
- The opportunity to develop you in your work to achieve your professional goals.

### Description of the service

You will work as a façade consultant with focus on façade design. This includes:

- Façade system development of system solutions suitable for different facades, requirements and solutions. 3D-sketching and detailing,
- Collecting and summarizing your work in easy readable reports, presentations, sketchbooks and specifications

You are working in close cooperation with architects, building contractors, construction engineers, glass contractors, project managers. Together with the customers, you discuss different solutions, ranging from complex technical calculations to design and design. You work in close cooperation with your colleagues, where everyone contributes with their specialist knowledge.

You will have the opportunity to work with and learn a lot of some of the most experienced facade specialists in Scandinavia. You will have the opportunity to participate in and influence interesting projects with the design of technically and economically sustainable facades where demands are constantly sharpened and the technical possibilities are in a fast and interesting development.

#### Desirable profile

- Construction Engineering Education Master of Science or Engineering within design.
- Good knowledge in building physics.
- Good computer skills and easy to learn a new computer programmes. Experience with AutoCAD, Revit, Sketchup are meritorious.
- You master English well, both in speech and in writing. Swedish skills are meritorious.

The job does not require you to have specific knowledge of glass and facades, but you need a general knowledge and understanding of building technology and engineering design solutions. You will be given all the necessary training and introduction and you will work with and learn from some of the best façade designers in Sweden.

#### Personal Properties

We are looking for you who are:

- Service-oriented, communicative and happy with customer contacts.
- A person who thrives in a consultative and advisory role.
- Responsible and can work independently with customers and colleagues.
- Structured and able to analyze problems, see contexts and prioritize correctly.
- Good to formulate yourself in writing as you will be responsible for writing investigations and reports.

Location: Gothenburg, by Järntorget

Start: As soon as possible
